

Tasks and Assignments

Docker CLI installation

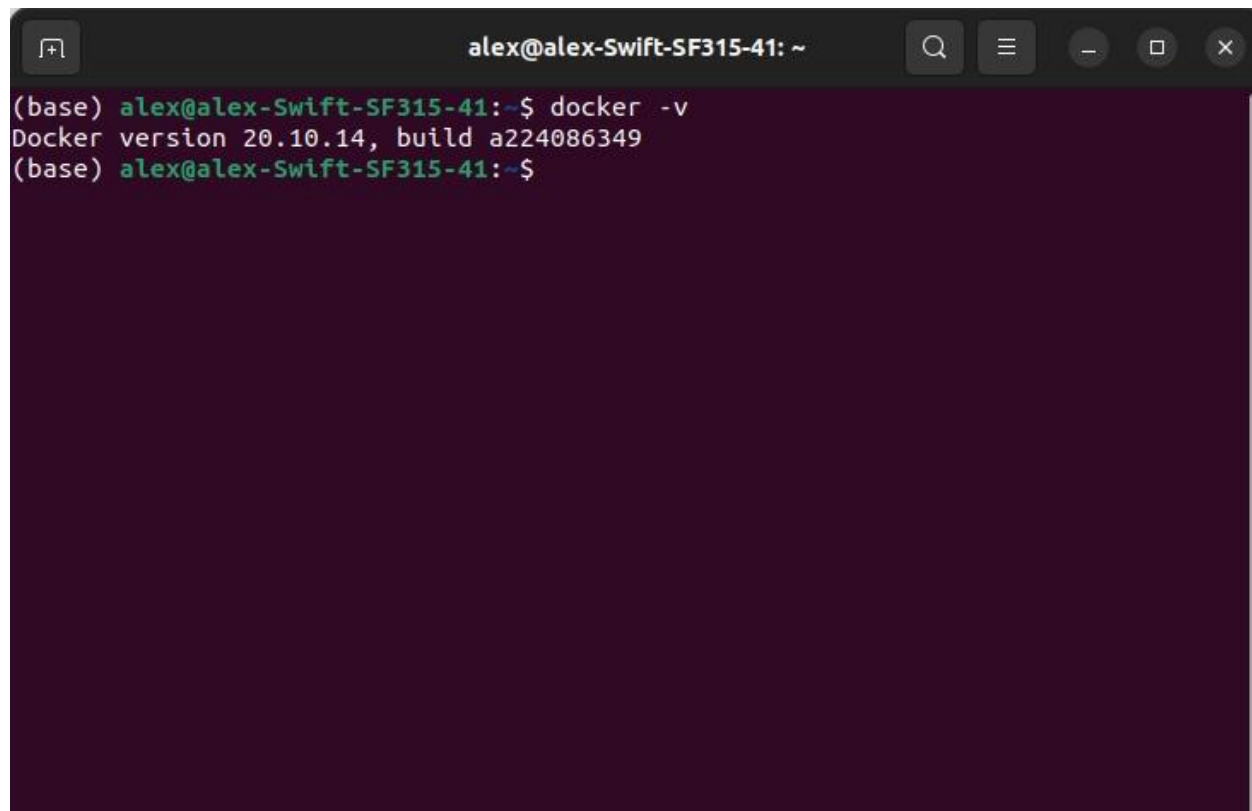

Date	12 October 2022
Student Name	Nandhini V
Project Name	Project -Skill and Job recommender application.

Step 1: Install curl from any package installer.

Step 2: Use the command “curl -fsSL https://get.docker.com/ | sh” to install docker cli

Step 3: Verify the installation using the "docker -v" command in the terminal

Step 4: Output is shown below.

A terminal window with a dark background and light green text. The window title is 'alex@alex-Swift-SF315-41: ~'. The terminal shows the command 'docker -v' being executed, which outputs 'Docker version 20.10.14, build a224086349'. The prompt returns to '(base) alex@alex-Swift-SF315-41:~\$'.

```
(base) alex@alex-Swift-SF315-41:~$ docker -v
Docker version 20.10.14, build a224086349
(base) alex@alex-Swift-SF315-41:~$
```
