

Assignments

Python assignment - 3

Date	23 September 2022
Student Name	Alex S
Project Name	Project -Skill and Job recommender application
Maximum Marks	2 Marks

Question :

1. Write code in IDE
2. Run code through command prompt

step 1 : open spyder

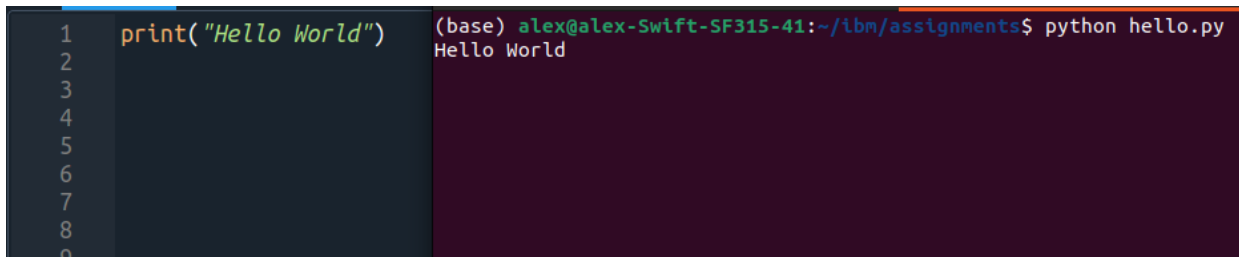

step 2 : write the code

step 3 : run the code > You save the file > change the directory in command prompt (change the file

path) > type in " python filename.py " >> python hello.py

Solution:

```
print("Hello World")
```

The screenshot shows a code editor on the left with a dark background and a terminal window on the right. The code editor contains a single line of Python code: `print("Hello World")`. The terminal window shows the command prompt `(base) alex@alex-Swift-SF315-41:~/ibm/assignments$ python hello.py` and the output `Hello World`.
